DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-11,14-18, drawn to disintegrating apparatus, classified in class
 241, subclass 236.
- Claims 12-13, drawn to fragmenting apparatus, classified in class 241, subclass 243.
- III. Claims 19-20, drawn to a construction method, classified in class 29.

 The inventions are distinct, each from the other because of the following reasons:

 Group I does not require the anvil surfaces of Groups II/III. Group III does not require the wheel mechanism of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Wright on 10/14/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
